EDUCATION

Bachelor of Engineering - Computer Science

St Joseph Engineering College (SJEC), Mangalore, Karnataka

CGPA: 8.5/10

Graduation Date: Jul 2026

SKILLS

Core Engineering & Frontend

C++, Data Structures, RxJS Observables, Angular, React.js, Next.js, Kotlin

Databases & ORM

PostgreSQL, MySQL, MongoDB, Drizzle ORM, Firebase Firestore, Appwrite, Real-time Data Streaming, SQL, Oracle Cloud Infrastructure Foundations

Backend & Integration Architectures

Node.js, NestJS, REST APIs, Python, Java, Data Synchronization, Client-Server Protocols, API Integration & Orchestration

UI/UX Designing & Creative

Figma, AdobeXD, Photoshop, Blender, CAD, SolidWorks

ACHIEVEMENTS

Organiser for HackToFuture2.0 | Hackathon

Jan 2024 - Apr 2024

Coordinated event logistics, participant tracking, and jury evaluation workflows to ensure seamless operations for hundreds of attendees by leading organizational efforts and managing the deployment of a real-time event application.

3rd at Medithon | Ideathon at Father Muller Medical College

Feb 2025 - Apr 2025

Developed a high-impact healthcare technology concept, securing 3rd place out of 300 competing engineering and medical profiles, by designing a technical prototype and pitching a viable implementation framework to a panel of expert judges.

5th at Manthan | National level Business Competition at FKCCI, Bangalore

Feb 2025 - Apr 2025

Formulated a scalable system architecture that finished 5th out of 600 nationwide team submissions by evaluating technical feasibility, optimizing data workflows, and presenting a robust enterprise strategy to industry evaluators.

PROJECT EXPERIENCE

Atlas - Hearing Enhancement App | Final Year Project

Dec 2024 - Oct 2025

Centralized user profile and metric storage, ensuring zero data loss during high-latency scenarios, by integrating the native application with Firebase Firestore for real-time secure database management.

Spotify Jam Webapp | The Sceptix Club, SJEC

Feb 2025 - Apr 2025

Architected a high-availability API integration and orchestration platform, successfully managing concurrent queues of over 10,000 data requests by designing robust session management and synchronizing real-time state across distributed services — demonstrating core iPaaS principles of API mediation, reliability, and data consistency.

Hospital Management System | CodeCraft Technologies

May 2026

Delivered an end-to-end enterprise data integration solution for a healthcare client, enabling seamless data flow across patient registration modules by integrating reactive frontend components with NestJS services, enforcing strict schema contracts, and ensuring compliance-ready data handling, aligned with EY's consulting delivery standards.

WORK EXPERIENCE

UI/UX Design Internship | NatureMark Systems

Jul 2025 - Nov 2025

Delivered user-centric digital interfaces that improved overall usability and accessibility, achieving full alignment with project objectives and brand guidelines, by collaboratively designing and prototyping new visual experiences.

Web Development Internship | Codecraft Technologies

Feb 2026 - May 2026

Engineered a multi-service integration environment for enterprise-grade deployment, eliminating manual bottlenecks by automating orchestration of Angular, NestJS, and PostgreSQL Docker containers via PowerShell scripts; and delivered high-performance backend data architecture using NestJS and Drizzle ORM mapped to PostgreSQL, directly supporting client data consistency requirements.
